### For immediate release

**(Kahnawake – 27, Seskehkó:wa/September 2021)** The Kateri Memorial Hospital Centre (KMHC) and the Public Safety Commission wish to remind the community that COVID-19 remains an important public health issue in Kahnawà:ke as it continues to spread with the emergence of variants of particular concern. As a result, careful assessment before deciding to visit, gather, or meet with others remains vitally important in the 'new normal.'

Using the best available scientific evidence and the input of leading experts in infectious diseases, public health and epidemiology, a website has been developed by Ryerson University's National Institute on Ageing (NIA) to help people of different ages and states of health better understand the factors that affect the risk of getting COVID-19 when visiting or gathering with others.

Click here to view the Risk Calculator:

[https://covidvisitrisk.com/?fbclid=IwAR3hduCiADGvKJKKv-dHghQfPgZJ3\\_ZSwVhaCTYakFRhzXI3UKluEGVeZts](https://covidvisitrisk.com/?fbclid=IwAR3hduCiADGvKJKKv-dHghQfPgZJ3_ZSwVhaCTYakFRhzXI3UKluEGVeZts)

Upon submitting your answers, a personalized report will be generated to help you understand the level of risk associated with your planned visit or gathering, as well as give you tips on how to try and make your proposed visit or gathering as safe as possible for the remainder of the COVID-19 pandemic.

The information you provide to access and use this website is collected anonymously for the purpose of providing you information about your possible level of risk of contracting COVID-19 and to make improvements to this tool.

This website has been verified and approved by Kahnawà:ke Public Health.
