New Traffic Light Sensors being installed today

(Kahnawake – 28, Kentenhkó:wa/ November 2016) The Mohawk Council of Kahnawà:ke would like to advise the community that the Ministère des Transport du Quebec will be installing new sensors on traffic lights at two intersections on Route 138 today.

The Intersections are located at Playground Poker and the old traffic circle.

Over the last few months the in ground sensors have been malfunctioning, causing some delays during the peak traffic hours.

The new sensor use soundwaves to detect vehicles at the intersection, and cycles the traffic signals when a vehicle is waiting to turn.

These sensors are easier to maintain and provide a more efficient means of traffic management.

Installation of the sensors is expected to be completed today.
