1	I don't go to Tioweroton very often because of the noise levels and the amount of recreational vehicles on the roads. There should be a limit on the amount of ATV's and minor should not be allowed to operate these vehicles. It is no longer peaceful and people do not respect nature.	5/4/2022 2:53 PM
2	Install [REDACTED] Rule where Caretakers can seize 4 wheelers from kids overnight and released to parent ,the next day	5/3/2022 5:51 PM
3	The growth of the community will put demand on available land in that area. Keeping an area the same size, while the population grows is not feasible.	5/3/2022 8:53 AM
4	questions are very vague, I do not know all the names of the lakes and where they are located,	5/2/2022 12:53 PM
5	There has to be some control measures it's a free for all up there. Act's are ridiculous and disrespectful. I don't go there anymore because of the bad practices people have developed.	5/2/2022 12:16 PM
6	Cabins between Cabins always will and should maintain the minimum 300 ft distance.. your there to enjoy the openness of nature and not to be cluttered with cabins afew feet from your door!! BTW it's mohawk land and not MCK land. the guidelines and understanding the people made in the past should always and will remain law of the land. And stay out of government hands. Good day	5/2/2022 9:44 AM
7	To help curb the increasing number of cabins can we limit cabins to families instead? My grandmothers cabin we had at least 4 aunts share so we had cousins there all the time? Also I oppose to your questions of #5 there was no alternative answer like " not at all". As well the Shooting range-really? sorry but I think that is just plain ridiculous. Cabins should be kept as simple as possible, no generators, no septic systems , no foundations. This was meant to keep us grounded and connect back to the land, we are so far away from that today that I almost feel we do not deserve land , we are not good stewards at all. I cannot find a spring to get water anymore. The medicines are overpicked, there is no quietness all you hear at night is generators and ATV's. Tioweroton should be closed for the winter and allowed to rest-no need to plow- really.	5/2/2022 9:18 AM
8	I didn't put anything for hunting because I don't know the areas except for the main roads, and the falls. Perhaps a map would have helped. Anyway, I think hunting should be kept in a safe area AWAY from all cabins. Also, cabins should be put in places that are all common to all. Not spread all over the reserve. I think it's important to keep the forest as forest as long as we can.	5/2/2022 9:05 AM
9	How about no permanent structures being built? I see cabins that are ridiculous in size. I say NO to septic tanks as well. Questions 5 & 6 don't offer option to say none of the above. I specifically did not choose any of those options and it may be misconstrued or incomplete when it is not. Our people need a reality check and realize that these beautiful forests are limited and that each new cabin is destroying it. Everyone feels entitled to take take take. How many cabin owners give back to Tioweró:ton? How many of them truly respect it? From this point on, cabin owners need to share, plain and simple. We need to protect these precious resources. I know of people who have built and then hardly if ever go there. Why is this allowed? It's sad to say that people can't live without generators either. It's changed so much from what I remember, people don't appreciate it or respect it. ATCs all over....noisy generators. Why go to Tioweró:ton if you need a satellite dish or a generator? Put a freeze on new cabins being built. If people get mad, too bad. They need to prove why they want to build....Why not consider only multi families looking to build? I am not in favour of building new structures. I think it's a shame that cabins were built across from the community campgrounds. If people are camping, it was beautiful that they could see forest in front of them. Now there's more cabins. Building needs to stop.	5/1/2022 12:44 AM
10	Not every person in a family should have a cabin. If you already have a cabin in your direct family that should be considered for approval of new cabins.	4/30/2022 12:00 PM

Tioweró:ton Cabin Development-Land Use Survey

11	Enforce garbage cleaning & stop the building now of "luxury homes) (what's still being called'cabins', when they aren't cabins). Try to keep people from further destroying (but what is called developing) because it's now becoming another urbanized/colonized reservation	4/30/2022 10:32 AM
12	Please do not allow an expansion of the cabin area, there is plenty of cabins here already that are left unused and expanding the cabin area will diminish the population of our natural wild game and fish.	4/29/2022 9:40 PM
13	I don't believe there should be basements allowed.supposed to be in nature not at your urban house.roads need to be fixed more often, and control of the dam bikes with the dust.some kids too young to be riding	4/29/2022 8:03 PM
14	There should a place the kids can go with their Atv's, motorcycles, Quads and sidebysides ..instead of them going back and forth on the main roads and side roads ... it use to be so peaceful in the past, people walked.. but now the road that my cabin is on has as much traffic as the highway at all hrs ... dusting me out and loud bikes .. it has lost its charm of peace and quiet.	4/29/2022 4:58 PM
15	Stricter generator time of use Not everyone follows the 10 pm curfew.	4/29/2022 4:22 PM
16	none	4/29/2022 1:14 PM
17	We should avoid developing and disrupting the natural areas as much as possible. There's a lot of people who already disrespect the land. We need more education on protecting the land and respectfully using it.	4/29/2022 12:24 PM
18	I noticed that some cabin requests this year came from individuals from the same families. In applications, I do think that applicants should be asked to state how many people in their immediate family already own cabins (parents, siblings, children). There should be more of an effort for people to share and priority given to people without access to family-owned cabins.	4/29/2022 12:05 PM
19	If a cabin owner has not been to Tiowero:ton in 5 years or more, their cabin ownership should be assessed and a process should go through with the owner. What are their plans? Do they want to sell it? etc. Another suggestion is if there are cabins that are clearly not in quality condition and not livable, MCK should assess the cabin, contact and update owner of the condition, and begin a process to demolish and post the land/spot for another community member to build on. Use the open spots as a first option when people are in the process of choosing a cabin location.	4/29/2022 11:46 AM
20	People should be aloud to build and there is no excuse stop them, we should support our people who want to build.	4/28/2022 11:49 PM
21	Roads will be made to access all these future cabins, so during road construction there should be more cleanliness while working. Downed trees dry up and is a fir hazard and an eyesore.	4/24/2022 7:50 PM
22	You should fix the main road by grooming it every few days	4/24/2022 9:44 AM
23	We should consider splitting the development territory between Kanehsatà:ke and Kahnawake. This way would be easier to minimize impact and control the rate of cabins being built.	4/23/2022 9:25 PM
24	questions need to be defined recreation activities need to be defined; ie skidooing,baseball,walking, NO MORE CABIN DEVELOPMENT ANYWHERE ! 29	Why are there not any room for suggestions on many of the questions asked? Why is there no question for people who are in the process of building. Why are families not given the choice/option of having their children extend/build their cabins on the same site as their families?	4/21/2022 1:26 PM
30	Why is it okay for some people to have █ buildings by their cabin ? Example a huge garage plus several other sheds . That is going over board plus their cabin . I find that being very greedy .	4/21/2022 12:54 PM
31	to many cabins are being build with all the same comforts of their homes, Tiowero:ton is supposed to be where everything is still as nature intended, not where you can clear away and show off money. If its not being used for traditional purposes, preseving cleanliness of medicines and waterways then we dont deserve to be there. Our responsiblility is to preserving the land, not removing or damaging it.	4/21/2022 12:50 PM
32	Tioweroton is for both communities. Keep this in mind when u needlessly expand that you have a responsibility to uphold. To the earth and to the animals do not ruin their homes for nothing.	4/21/2022 11:36 AM
33	We need to expand areas to build new cabins it starting to Look like a mini Kahnawake town and people are just taking large amount of lands. There should be a cap on each lot on how much everyone is entitled too. Also some cabins have concrete foundations on them those who have foundations should be told to remove them. I believe it's in the policies yet No one is doing anything about this?	4/21/2022 8:53 AM
34	toiweroton is already a recreational place, there is no need to set aside areas. if a person already owned a cabin but no longer does, that person and his spouse should not be allowed to have another space. 1 cabin per person/couple. in divorce, they must share the cabin.	4/21/2022 8:01 AM
35	Since 1990 there has been too many cabins built and the wildlife and fishing is impossible because there are too many cabins with generators scaring the wildlife away. 38	The question in this survey are not clear. Question 5: I don't want no more development and I didn't have anywhere to write it. The caretakers are doing a great job but when there is over 400 people up there they cannot be everywhere. I had to leave my cabin one weekend because it was nuts . No peace at all. Noise , generator, four wheelers, motocross, it's worst and worst every year. Me and my husband go there to enjoy the nature but for the past years forget that it doesn't exist.	4/20/2022 2:53 PM
39	If moves are made towards septic tanks, there would need to be strict regs because I foresee people just emptying them onto the lots when getting full, rather than spending the \$ to have it pumped. For the shooting range, I think it's best to keep it where it is bc during hunting season you'd scare away all the animals if it was closer to the fire road direction. Also, it's not explicit but for cabin development, i'd like it stated that there should be no more new areas being developed. More people want cabins, but maybe we should start looking at other ways to fix it like sites that are no longer being used, buy them out and sell them back to the community, or turn them into rentals like question 4 is asking.	4/20/2022 8:56 AM

46	Keep structures to 20x30 cabins, not full luxurious homes. Limit the amount of square footage of trees removed. Ban alcohol/substance from the territory. It's meant for living our ways, good minds.	4/19/2022 10:31 PM
47	There is a real need for trail maintenance on all trails , lake vaillancourt , there is no more road, there is no access, it's dangerous for any age to try to get to the lake. Fire road is another no accessible, dangerous even on a side by side. The main road in the summer time should have a grater passing threw more often, with so many more people driving on the road. I didn't understand Question 6.	4/19/2022 9:48 PM
48	The natural state should be maintained as much as possible to ensure the existence of flora and fauna. If you observe the losses suffered in other native communities when the lands have been exhausted of it's natural state and all the resources ...there is nothing left for future generations not to mention the loss of medicines and animals. Also, I feel it is necessary to put a plan in place to manage the resources when cabin sites are cleared and new roads built as there is a large amount of wasted trees. Our guidelines need to evolve to ensure that these trees that are cut are not just wasted. There are a number of things that they could be used for...instead of piling on the side of the road to waste away. Those resources can be used to produce lumber for cabin construction or sold and used for the maintenance and up keep of the lands. This does not equate to making a profit from the resources but rather better managing what is being harvested and putting it back to continuously improve Tioweroton. We must think outside the box and evolve our thinking. Instead of just wasting. We need to find creative ways to manage and re-use what is being harvested. As far as the shooting range is concerned, it needs to be upgraded to be more safe for everyone to use. The range is a necessity to ensure that hunters are sighting in their rifles before hunting to increase the odds of a clean and successful hunt with the least amount of suffering to the animals. As for Cabin construction it should remain with in the boundaries that are in place however open as many viable areas within said boundaries to ensure optimal lots available. The northern end and lake areas should not be open to construction. As the land base is so small these areas need to be protect and kept solely for medicines, hunting and fishing purposes. Once these areas are inhabited this will cause negative effects on the animals, plants and will reduce the safe areas to hunt and fish. We must preserve these areas to ensure future generations have the opportunities to learn and practice traditional ways. We must remember that once these areas are gone they are gone. Look at the lands surrounding Tioweroton and what's happening there. Those lands are being quickly developed and the natural state of these lands and resources are being eliminated. Thanks.	4/19/2022 9:34 PM

52	Cabin sizes should be maximum size. Where once you could put 3 cabins there's a single big ass mansion. This area is hunting n fishing n gathering. Those that don't respect this are the ones who mess it up for others. If you want your big [REDACTED] tv n air conditioner. Stay home.	4/19/2022 8:58 PM

54	All available lands surrounding Tioweroton should be purchased by Council to expand. Also a Co-op would be great, non-profit selling gas, kerosene cabin supplies fishing, hunting so money stays in the community. Also concrete foundations, when you have to have your cabin lifted and leveling every other year not fun, also would keep the critters out. Considering people are spending a good amount on their cabins it only makes sense to make them more sturdy. This would also delete floor rot.	4/19/2022 8:11 PM

59	My lot was approved in january of 2017. I worked my [REDACTED] off and spent all my time to get my family and i into our cabin. My cabin is small, 12'x20'.. in october of 2020 we finally moved our stuff in. It was my goal and my dream to have my own cabin in tioweroton. So it took me a little over 3 years to build my cabin with the amount of \$ i was able to put into it. I look around at other situations and everyone is different, parents with kids in sports may not have the same time resources i did while building mine. So we gotta be considerate when it comes to our people wanting to have their own cabin. All the lands between cabin area and boundary lines need to remain for hunting and fishing. Thats what its for. My idea of when it comes time that there is no more room to build cabins. And it seems to be coming soon!. Mck needs to look into purchasing or laying claims on more lands that will be for cabin building. Our community isnt shrinking. I hope one day my sons have a place to hunt and fish in our traditional territories. Consider purchasing or claiming new area attached to our extended territory of tioweroton. 62	Prior to building a new cabin, potential cabin owners could be given the opportunity to take over an abandoned cabin and fix it up to preserve land.	4/19/2022 7:02 PM
63	I think when talking expansion for cabins, roads that already exist could be extended if not disturbing sensitive areas(medicine hunting fishing) On another note, when it comes to safety for all residents and visitors I strongly feel that all individuals should take a mandatory motor-vehicle safety course.	4/19/2022 7:00 PM
64	People need to respect the environment and each other. Perhaps each cabin owner sign a declaration to that effect and place document in their cabin as a reminder.	4/19/2022 6:53 PM
65	People are sick and tired of the dust from bikes in the summer, caretakers have to open up and maintain the trails so the kids have places to ride.	4/19/2022 6:49 PM
66	Not everyone deserves to have a cabin. You should be 25 and older to build one and families should be subject to share cabins.	4/19/2022 6:37 PM
67	Cabins that go up for sale should be publicly posted at the front cabin.	4/19/2022 6:34 PM
68	When it comes to who gets cabin allotments, it should try to be limited to 1 per family. Lately I have been seeing multiple applications from immediate families (mother/father/children/siblings) taking up sites so they can create family "compounds". This is what is leading to overdevelopment up in Tioweroton, when that territory was never even intended to be the way it is now, but was meant as a site to practice our traditional and cultural rights (hunting, fishing, gathering). A yearly cap or limits on multiple family cabins should be looked into. Should also revoke sites for people who have dilapidated & abandoned cabins on them so they can be given out again.	4/19/2022 6:33 PM
69	People with cabins and have a non Native partner shouldn't be able to bring them for overnight or stay in the cabins	4/19/2022 6:29 PM
70	Kahnawake should be making public roads and not the responsibility of the cabin owners. 2 years is not enough time for a regular person who works 5 days a week. You can't build when there's snow. We don't all have cigarette money to build a cabin in a month. You need to have more consideration for people who can't afford to build a mansion in tioweroton. We are entitled to build but the time restrictions are ridiculous.	4/19/2022 5:46 PM
71	More should be done to encourage walking and pedal biking. Decrease the number of ATVs on the main road to decrease noise, dust and pollution. A shower/bathroom house near the main entrance would be good to discourage people from bathing or washing dishes in the creeks. Could charge money for shower use like campgrounds do.	4/19/2022 5:24 PM

big giant mansion cabins all over? What about the wildlife? There is a lack of respect, the amount of garbage is so horrible, please encourage people to reduce and use environmentally and biodegradable products, soaps, shampoos, etc.. I go to Tioweroton to pick medicines from spring to fall...trails to medicine spots might lead to over harvesting and might not allow plants to recover.... Especially turtle socks as they are an endangered plant. Info on picking medicines including traditional ways of respect for them should be shared with community. If I want peace and quiet, I have to take my family far into the mountains on trails, it's unfortunate the amount of dust and noise from bikes are created, I know people go there to use them for recreation but is there anything you's can do to limit the use? PLEASE CONSIDER HOW MUCH TIOWEROTON IS BEING DEVELOPED!! Please stick up for the environment because no one else will!

75	Mck should have no jurisdiction over Tiowero:ton! Back off.	4/19/2022 5:01 PM
76	We need to keep it as natural as possible and also still allow kids to ride their ATV. Maybe building small cabins at the front for rentals will allow more people to visit and enjoy Tioweroton as is. Also make a new communal swimming area that can accommodate multiple families.	4/19/2022 4:42 PM
77	Tioweroton is no longer a place i want to visit. Its a free for all with a bunch atv's roaming everywhere and noisy generators going at all hours. Its not a peaceful place to spend a weekend at all.	4/19/2022 4:37 PM
78	We need to keep our tiowero:ton as pure as long as we can for our hunting n fishing	4/19/2022 4:37 PM
79	There are way to many people building. The territory does not have a chance to re cooperate. There should x when no one should be there. Hunting every second yr. Conservation officers be present. Atv should not be allowed pass kirbys cabin to falls. You want to go near the water you have to walk in.	4/19/2022 4:34 PM
80	Range 7 area would be best for developing. It has plenty of flat land and would just need a road through some wetland to access these areas. Tioweroton is a hunting and fishing territory and if we start expanding the residential side into our hunting and fishing areas then we lose what love about this place.	4/19/2022 4:23 PM
81	Keep a limit on cabins being built per year to 10 and 18 months to build. If we don't limit our footprint now we will never have the natural forest back that we need to be who we are. Build communal cabins in the old sand pit area all around the perimeter close to each other while maintaining privacy with tree plantings and build a walking path around. We need this land to be natural for medicines and hunting and not so much for recreational porpoises. We make do with what we have and can go all around the territory for recreational porpoises but we can never get the land back as is if we disturb it now. We need to think of the next 7 generations and beyond. Nia:wen	4/19/2022 4:22 PM

85	I think revisiting the study that was conducted (in the early 2000s) that said where all the sensitive areas are that should be protected, should be followed. Tiowero:ton is not for destroying with 4 wheelers and abandoning cabins and leaving behind a garbage trail. Traditional Ecological Knowledge, culture, and medicinal awareness should be the focus of our people. Being careless disruptive and wasteful in regards to our sensitive areas is cultural and ecological genocide. If we followed the study today Tiowero:ton would definitely be a more pleasant place to explore, enjoy and feel safe. Its should be encouraged for the people to know how to pick medicines, hunt and not worry that the land is being destroyed and worse is knowing that we caused it to die.	4/19/2022 4:00 PM

93	The questions and this survey should have come with more information regarding the impacts choices could have, similar to the septic tank notation. Every choice here has a short and long term effect on Tioweroton and the resources. Don't believe you provided that information therefore I could not answer the questions. Don't even know where some of these locations are, own cabin but don't frequent often. You have so many requests these past few years probably due to Covid and people not able to travel. The cost of lumber might have a future impact on amount of people who can actually build. Start with people being ready to build within a set time frame and if not, go to next person on list. Why do we even have a shooting range? The way Tioweroton operates now, an accident waiting to happen.	4/19/2022 3:37 PM
94	People should stop modifying the flow of the creek, and should be more careful to avoid contaminating the waters with sulphates (dish soaps, detergents, fuels from ATVs). I feel like the fishing has drastically worsened in the last decade.	4/19/2022 3:35 PM

97	The development has been a burden to the wildlife , fish and hunting. I've been going for my 48 years and it has become unbearable with the 4 wheelers side by sides and dirt bikes. No noise suppression or respect for the land , property and hiking and walkers. Due to the pandemic, the number of people who want to go and build there has been heavy on the environment. Hunting for deer and moose has been harder as the young teens who have access to 4 wheelers and are using the fire road as a dirt track has really ruined it. Try walking in the summer, it is dangerous as they do not follow the recommended speed limits, quiet times and respect to people who have cabins near the road. It is like the wild west and its very unpleasant when its supposed to be a place to relax and escape. A big solution would be to move/close the sand pits for riding else where, near the front and where there is less population. I am completely against making the cabins closer than 250m. We do not want to see and hear our neighbors. It'll be like a campground outside where there is RV on top of RV and we can smell the neighbors dinner being cooked.	4/19/2022 3:24 PM

101	I am so glad that this survey came out! It's a great place for me to express my concerns! HONESTLY, there are way to many people applying for cabins in the recent years! There is not enough space and the majority of the people don't even go to Tioweroton often and they want to build! There will be NOTHING left for our future generation and it's really alarming! What NEEDS to be protected from ANY type of development is the hunting grounds starting right after the Lazare's road going up towards Wendy and Gerry's. My fear is that development will start to happen and will push away what animals we have left and that area is NOT for development purposes, it's hunting grounds! No development should happen anywhere going	4/19/2022 3:19 PM

towards Wendy and Gerry's NOR the fire road! There NEEDS to be a cap on applications and stricter requirements on people wanting to build because this is becoming ridiculous! Tioweroton isn't what it use to be and I would HATE to see it turn into another town but that's where it is going! I will fight tooth and nail to make sure that the cable road (towards Wendy and Gerry's) along with the fire road will be protected from any kind of development! I don't care if there isn't any more spots available to build a cabin, don't take away what little we have left to please people! I could go on and on but I will stop here and I HOPE my input WILL be considered!

106	Ban cabins larger than 800sq.ft, some of the mansions are just getting ridiculous and it's not in the spirit of what Tiowero:ton is for.	4/19/2022 3:04 PM
107	The community should incentivize family owned/shared cabins to reduce the number going up each year. Create a program for single parent & low income families. It's mainly ppl with extra money building up there. Stop letting the rich pay for private roads to prime spots. The wealthy are getting special treatment.	4/19/2022 3:03 PM
108	Cap the amount of cabins per family. Back in the day, families shared cabins (grandparents, parents, grandchildren). Now every sibling wants their own cabin.	4/19/2022 3:03 PM
109	I don't think its right that every branch of 1 family can build a cabin. Their are areas made up of multiple lots where every lot is claimed by the same family. A family with 2 cabins is one thing but their are families where every sibling are building their own cabins.	4/19/2022 2:53 PM
110	Rules need to be enforced regarding noise and vehicles. Children without helmets stacked 5 on an ATV are too common. And buildings should be cabins and not luxury chalets with septic and running water.	4/19/2022 2:43 PM
